

"We are new to the area, so didn't have much knowledge about the school from a local community perspective."

"After a very stressful time going through the process of not getting place in any of our chosen schools, joining waiting lists and submitting endless school appeals, we found Heaton Avenue Primary school. After 6 months at home, because of the corona virus we had a long list of worries, but the teachers, the teaching assistants and the staff put us at ease from the first minute we crossed the school gates. Two months on and my child is more confident and more happy than ever. It is a joy for him and for us as parents to attend this lovely school with amazing staff."

"We were really worried about our children settling into the school as all parents are, especially not having accessed any other form of educational settings and the fact that our children had not yet established any friendship circles within the local community."

"My background is within the early years, and I can say that what my little ones are learning and how quick they are progressing is fabulous."

COMMENTS FROM OUR PARENTS

"So took a leap of faith and I can honestly say it was the best decision I had made in terms of my children's education."

"We did some research on the school via the ofsted website and was pleased with the outcomes the school was achieving as a whole."

"This school is very inclusive of all and its ethos is very much about caring for one another, being kind and learning happily."

"The school staff are so welcoming and lovely, they take great care in all aspects with the children, from prioritising their needs, supporting their learning and development as well as their mental health and well being."

"My little ones love attending school and are flourishing."

"I really can't find the words to express how good this school is. This is to do with the staff and leadership itself. They are very reassuring and supportive and listen to the views and comments of parents."

"I hope this helps and gives some insight to parents/carers with making such a big decision about their little ones future"
